

**PICARD RIP AND FRAMING
HAMMERS: THE HAMMERS WITH
THE PERFECT LENGTH**

DER HAMMER. SEIT 1857

THE POWER- HOUSES FROM PICARD

- + Extra-long shafts for a greater range and leverage
- + A strong straight rip claw for more stability when pulling nails and prying nailed wood apart
- + Solid steel for maximum durability
- + Ideal for extra-long nails
- + Top PICARD quality
- + Made in Germany

LENGTH WORKS

HEAD

- Forged with alloyed, hardened, special steel and given a smooth finish
- A straight rip claw on both sides for greater stability when prying and pulling nails
- Nail starter with an extremely strong magnet

FACE

- Carefully hardened and specially tempered round face
- Milled or plain face
- Milled version with particularly deep checks

SHAFT

- Two lengths available
- Forged and weight-optimised for perfect balance and maximum impact
- Shaft turns smoothly into the grip
- Great impact momentum and ease at reaching tough spots
- Ideal for long or thick nails and for prying nailed wood apart

LEATHER GRIP

- Grips made of real leather that resist twisting
- Extremely wear-resistant and moisture-absorbing surface

TWO-COMPONENT HANDLE

- Ergonomically optimised
- Vibration-dampening
- Extremely durable

GRIP CAP

- Non-slip protection

Working efficiently means being able to hit hard to reach spots with a hammer. Therefore the old rule applies: Length works.

The rip and framing hammers from PICARD originated where wood frame construction has a long tradition: in America. The long shaft gives these hammers considerably greater impact momentum. This pays off especially when working with long or thick nails.

It's also useful in demolition work, for when the going gets tough, a hammer often has to do the job of a crowbar. The extra-long shafts of the rip hammers give even greater leverage force when prying nailed wood apart.

PICARD also equips the hammers of the 795 and 595 series with a claw on both sides and manufactures them as solid steel tools with a real leather or two-component handle. For maximum durability and application safety.

RANGE OVERVIEW

Order-No.	Description	Art-No.	GTIN
0059500-22	Rip hammer with 2-K-handle, plain face	595	4016671032369
0059510-22	Rip hammer with 2-K-handle, milled face	595	4016671032376
0059600-22	Framing hammer with 2-K-Griff, plain face	596	4016671032383
0059610-22	Framing hammer with 2-K-handle, milled face	596	4016671032390
0079500-22	Rip hammer with leather grip, plain face	795	4016671032406
0079510-22	Rip hammer with leather grip, milled face	795	4016671032413
0079600-22	Framing hammer with leather grip, plain face	796	4016671032420
0079610-22	Framing hammer with leather grip, milled face	796	4016671032437

In the PICARD factory in Wuppertal-Cronenberg, it's the experience of the employees that counts. They take great pains to produce precisely those tools that have built our good reputation for generations.

MADE IN GERMANY

From the very beginning in 1857, when Johann Hermann Picard established the company, we have produced tools at our factory in Wuppertal-Cronenberg. Whether by traditional handwork or by applying computer-based construction methods – we always use the proper techniques at the right stage of the production process. We process 700 tonnes of steel annually, which is melted specifically for us based on our own analysis. This is done with the utmost expertise, attention to detail and care – in keeping with the way our customers unfailingly carry out their own handwork. And with one goal in mind: to produce the best and safest tools.
